

Secured Funding for your Clients

Having the ability to provide additional financial facilities to your clients is a proven method of strengthening and maintaining effective client relationships and unlocking your clients potential.

The Personal Loan Company specialises in both residential and commercial secured loans for any purpose including consolidation, capital injections and funding new business premises. The only constraint on borrowing is governed by the value of the property.

If you have a client that needs a secured loan, then we can help you. Through our extensive panel of lenders, we will work quickly to tailor a loan to your clients' particular needs, irrespective of circumstances.

Our introducer benefits ensure that you are also able to take advantage of our unique incentive structure upon successful referral in reflection of the hard work, time and money you have invested in developing your own client base.

To take advantage of these benefits or to find out more about how a secured loan can assist your clients, please contact one of our consultants today on:
